

SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR FACILITATING APPOINTMENT-RELATED ACTIONS

ABSTRACT OF THE DISCLOSURE

5 A system is provided for facilitating an appointment-related action. The system includes an organizer and a mobile station. The organizer is capable of providing appointment information, and sending the appointment information, such as to the mobile station. In this regard, the appointment information includes an appointment, a starting action and an associated starting trigger time. The appointment information can also
10 include an ending action and an associated ending trigger time. The mobile station is capable of receiving the appointment information. Thereafter, the mobile station can be triggered to perform the starting action at the associated starting trigger time, and can then perform the starting action. Similarly, the mobile station can be triggered to perform the ending action at the associated ending trigger time, and can then perform the ending
15 action.
